

## [Township Launches New Internship Program](#)

College students-Are you interested in pursuing a career in government? Would you like to know more about how your local government operates? Why not apply to participate in the Township's unpaid internship program as part of your college curriculum? Starting this spring, the Township will offer students an exciting opportunity to translate what is learned in the classroom into a practical, hands-on learning experience.

Today, there is an ever-growing demand to attract young men and women to serve on the local, state or federal levels of government. To follow this career path, students can specialize in one of many different fields leading to degrees in public management, finance, health care and engineering to name a few.

The objective of the internship program is to link a student's major or curriculum to a Township department or agency that will provide the student with first-hand knowledge of the nuts and bolts of day-to-day government operations.
